

Nicolás Emanuel Bugedo

Full Stack Developer

nicolas@bugedo.dev · [bugedo.dev](#) · [github.com/Bugedo](#) · [linkedin.com/in/nicobugedo](#)
Córdoba, Argentina (GMT-3, US-overlap friendly) · Remote · Available to start immediately · English C1

PROFILE

Full stack developer maintaining **three revenue-generating systems in production**: a court booking platform handling 50+ reservations per week, an online ordering platform for a multi-location food brand, and an events platform that processed RSVPs and payments for 1,500+ guests. For Ewents (US) I built an internal CRM that eliminated roughly 80% of the team's manual spreadsheet work. I own the full delivery cycle — discovery, scope, development, deployment and support — and ship daily with AI-assisted tooling (Claude Code, Cursor, Copilot).

EXPERIENCE

Full Stack Developer · Developing Bridges (own studio, direct clients)

May 2025 – Present · Remote

- **Abdonur** ([abdonur.com](#)): ordering platform for a multi-location Middle Eastern food brand — dynamic catalog, per-branch order routing and WhatsApp checkout. Live in production, actively maintained.
- **Mundo Padel Club** ([mundopadelclub.com](#)): booking system for 3 courts with 50+ confirmed weekly reservations — full authentication, email confirmations and bar-consumption tracking.
- **Events platform** that processed RSVPs and payments for 1,500+ guests, with real-time pricing managed by the client through Google Sheets.
- Cut a client's monthly infrastructure cost by migrating them to **self-hosted Supabase** on Ubuntu at Hetzner — provisioning, hardening and backups included.

Full Stack Engineer (Contract) · Ewents

Aug 2025 – Mar 2026 · United States, remote

- Built an **internal CRM from scratch** (Angular 18, Hono on Cloudflare Workers, Supabase/PostgreSQL) with automated invoicing, commission calculation and timesheet approval — cut ~80% of the team's manual spreadsheet work.
- Built an **edge microservices backend** with sub-50ms global response times and zero-downtime CI/CD deployments.
- Coordinated daily in English with a distributed team and non-technical stakeholders.

Electrician & Solar Technician · Self-employed

2017 – 2024 · Argentina

- Ran my own electrical and solar installation business: on-site troubleshooting, hard deadlines and real safety stakes.
- Taught myself software development on the side — landed my first paying client three months in, and a contract with a US company three months after that.

STACK

Frontend	React · Next.js · TypeScript · Angular 18
Backend	Node.js · Hono (Cloudflare Workers) · Express · REST · Prisma
Data	PostgreSQL · Supabase · MongoDB
Infra	Docker · Hetzner (Ubuntu, self-hosted Supabase) · Vercel · Railway · CI/CD · Git
AI workflow	Claude Code · Cursor · GitHub Copilot

EDUCATION & LANGUAGES

2013 – 2016	Information Systems Engineering (3 years completed) · UTN FRC, Córdoba
2024 – 2025	Full Stack Curriculum · The Odin Project · freeCodeCamp
Languages	Spanish native · English advanced (C1) · Italian intermediate (B1)
